

With the Seafood Watch app you can search for seafood or sushi, view the seafood A-Z list, and access in depth information on sustainability, aquaculture and more from the home screen. Go to the menu to find more options. There is an A-Z list for sushi, options to find a local business that offers sustainable seafood, and you can even add one that you know about. Find updated information here and view helpful terms in the glossary. When searching, use common market names or you can use Japanese names for sushi. Recommendations are color coded for Best, Good, and Avoid. For more details on the ratings tap the information button. To sort your results select from the available descriptions. Tap any recommendation to get more details.
